1 **SEC. 2. FINDINGS.**

2 Congress makes the following findings:

3 (1) The overall health of Americans has dra-
 4 matically improved over the last century, and Ameri-
 5 cans are justifiably proud of the great strides that
 6 have been made in the health and medical sciences.

7 (2) As medical science and technology have ad-
 8 vanced at a rapid pace, however, the health care de-
 9 livery system has not been able to provide consist-
 10 ently high quality care to all Americans.

11 (3) In particular, people of lower socioeconomic
 12 status, racial and ethnic minorities, and medically

1 underserved populations have experienced poor
2 health and challenges in accessing high quality
3 health care.

4 (4) Recent studies have raised significant ques-
5 tions regarding differences in clinical care provided
6 to racial and ethnic minorities and other health dis-
7 parity populations. These differences are often
8 grouped together under the broad heading of “health
9 disparities”.

10 (5) Studies indicate that a gap exists between
11 ideal health care and the actual health care that
12 some Americans receive.

13 (6) Data collection, analysis, and reporting by
14 race, ethnicity, and primary language across feder-
15 ally supported health programs are essential for
16 identifying, understanding the causes of, monitoring,
17 and eventually eliminating health disparities.

18 (7) Current health related data collection and
19 reporting activities largely reflect the efforts of the
20 Department of Health and Human Services. Despite
21 considerable efforts by the Department, data collec-
22 tion efforts governing racial, ethnic, and health dis-
23 parity populations remain inconsistent and inad-
24 equate. They often quantify disparities but shed lit-
25 tle light on their causes.

1 (8) Many Americans, and particularly racial
2 and ethnic minorities and other health disparity pop-
3 ulations, miss opportunities for preventive medical
4 care. Similarly, management of chronic illnesses in
5 these populations presents unique challenges to the
6 nation's health care system.

7 (9) The largest numbers of the medically under-
8 served are white individuals, and many of them have
9 the same health care access problems as do members
10 of minority groups. Nearly 22,000,000 white individ-
11 uals live below the poverty line with many living in
12 nonmetropolitan, rural areas such as Appalachia,
13 where the high percentage of counties designated as
14 health professional shortage areas (47 percent) and
15 the high rate of poverty contribute to disparity out-
16 comes. However, there is a higher proportion of ra-
17 cial and ethnic minorities in the United States rep-
18 resented among the medically underserved.

19 (10) While much research examines the ques-
20 tion of racial and ethnic differences in health care,
21 less is known about the magnitude and extent of dif-
22 ferences in the quality of health care related to non-
23 socioeconomic factors. Only recently have scientists
24 and quality improvement experts begun to address
25 the issue of how best to measure, track, and improve

quality of health care in diverse populations. Additional research in order to understand the causes of disparities and develop effective approaches to eliminate these gaps in health care quality will be necessary.

(11) There is a need to ensure appropriate representation of racial and ethnic minorities, and other health disparity populations, in the health care professions and in the fields of biomedical, clinical, behavioral, and health services research.

(12) Preventable disparities in access to and quality of health care are unacceptable. Health care delivered in the United States should be care that is as safe, effective, patient-centered, timely, efficient and equitable as possible.

TITLE I—IMPROVED HEALTH CARE QUALITY AND EFFECTIVE DATA COLLECTION AND ANALYSIS

SEC. 101. STANDARDIZED MEASURES OF QUALITY HEALTH CARE.

(a) IN GENERAL.—

(1) COLLABORATION.—The Secretary of Health and Human Services, the Secretary of Defense, the Secretary of Veterans Affairs, the Director of the

1 Indian Health Service, and the Director of the Of-
2 fice of Personnel Management (referred to in this
3 section as the “Secretaries”) shall work collabo-
4 ratively to establish uniform, standardized health
5 care quality measures across all Federal Government
6 health programs. Such measures shall be designed
7 to assess quality improvement efforts with regard to
8 the safety, timeliness, effectiveness, patient-
9 centeredness, and efficiency of health care delivered
10 across all federally supported health care delivery
11 programs including those in which health care serv-
12 ices are delivered to health disparity populations.

13 (2) DEVELOPMENT OF MEASURES.—Relying on
14 earlier work by the Secretary of Health and Human
15 Services or others (including work such as the
16 Healthy People 2010 or the IOM Quality Chasm re-
17 ports) and with an emphasis on health conditions
18 disproportionately affecting health disparity popu-
19 lations and taking into account health literacy and
20 primary language and cultural factors, the Secre-
21 taries shall develop standardized sets of quality
22 measures for—

23 (A) 5 common health conditions by not
24 later than January 1, 2006; and

1 (B) an additional 10 common health condi-
2 tions by not later than January 1, 2007.

3 (3) PILOT TESTING.—Each federally adminis-
4 tered health care program may conduct a pilot test
5 of the quality measures developed under paragraph
6 (2) that shall include a collection of patient-level
7 data and a public release of comparative perform-
8 ance reports.

9 (b) PUBLIC REPORTING REQUIREMENTS.—The Sec-
10 retaries shall work collaboratively to establish standard-
11 ized public reporting requirements for clinicians, institu-
12 tional providers, and health plans in each of the health
13 programs described in subsection (a).

14 (c) FULL IMPLEMENTATION.—The Secretaries shall
15 work collaboratively to prepare for the full implementation
16 of all standardized sets of quality measures and reporting
17 systems developed under subsections (a) and (b) by not
18 later than January 1, 2009.

19 (d) PROGRESS REPORT.—The Secretary of Health

21 port that details the collaborative efforts carried out under
22 subsection (a).

23 (e) COMPARATIVE QUALITY REPORTS.—Beginning
24 on January 1, 2008, in order to make comparative quality
25 information available to health care consumers, including

1 members of health disparity populations, health profes-
2 sionals, public health officials, researchers, and other ap-
3 propriate individuals and entities, the Secretaries shall
4 provide for the pooling and analysis of quality measures
5 collected under this section. Nothing in this section shall
6 be construed as modifying the privacy standards under the
7 Health Insurance Portability and Accountability Act of
8 1996 (Public Law 104–191).

9 (f) ONGOING EVALUATION OF USE.—The Secretary
10 of Health and Human Services shall ensure the ongoing
11 evaluation of the use of the health care quality measures

22 Health and Human Services shall request the
23 Institute of Medicine to conduct an evaluation

3 grams as required under this section.

4 (B) REPORT.—Not later than 2 years after
